

## **Eclipses – Rules to Remember---by Judy Collins**

1. Eclipses show where change is needed.
2. If there is no need for change, then nothing will occur.
3. Think of Eclipses as a new opportunity.
4. Keep the orbs tight (within 3-5 degrees).
5. Check Progressions for Eclipse degree.
6. Eclipses that *Conjunct* or are in *Opposition* to a natal planet are the strongest.
7. Eclipses in angles (1st-4th-7th-10th) are more powerful.
8. Minor aspects have little effect in Eclipses.
9. Note on chart where the Eclipses will fall.
10. Do the Solstice Points of Eclipses and mark chart.
11. Mark transits that are *Conjunct, Opposition, or Square* an Eclipse point.
12. Mark Critical Degrees in Eclipse chart.
13. Cardinal-0-13-26 Mutable-4-17 Fixed-9-21
14. Note last same Eclipse-what happened in your life?
15. How effective was this Eclipse causing events?
16. Never ignore an Eclipse; they will "*get you*" when you least expect it.

**THE ECLIPSE FALLS IN WHAT HOUSE?**

**THE ECLIPSE CONJUNCTS OR OPPOSES WHAT PLANET?**

**MAJOR TRANSITS TO THIS ECLIPSE POINT?**
